# 14\_Create Events for Auto Triggers Ingestion Snowpipe

# 16\_Create Azure Logic App to Create Email Notification if Snowpipe is Failed

The screenshot displays the Microsoft Azure portal interface for the Logic App Designer. The browser address bar shows the URL: `portal.azure.com/#@hyperisland.se/resource/subscriptions/526aada7-5019-464f-ad80-f108f0fd61f5/resourceGroups/final_assessment_linggar/providers/Microsoft.Logi...`. The user is logged in as `linggar.pangestu@hype...` under the `School` profile.

The Logic App is named **app-snowpipe-error-alerts**. The left sidebar contains navigation options: Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Resource visualizer, and Development Tools. Under Development Tools, the Logic app designer is selected.

The main workspace shows a workflow with two steps:

- When a resource event occurs**: The trigger step.
- Send an email (V2)**: The action step, connected to the trigger.

The right-hand pane shows the configuration for the **Send an email (V2)** action:

- Parameters** tab is active.
- To \***: `linggar.pangestu@hyperisland.se`
- Subject \***: `Snowpipe Data Load Failed`
- Body \***: `Snowflake has detected a corrupted file. Error Details: [Event data]`
- Sensitivity**: `Sensitivity`
- Advanced parameters**: Search bar with `Show all` and `Clear all` buttons.
- Importance**: (Empty field)

At the bottom of the workspace, there is a **Run draft** button. A footer note states: *Add or remove favorites by pressing Cmd+Shift+F*.

Snowflake is enforcing strong authentication for all users starting August 31, 2026. Password authentication is no longer supported for connecting to Snowflake. Update your credentials to use key-pair for deployment or OAuth for development environments.

Email notifications

Model notifications

Environment traffic\_environment

Enable group/owner notifications on models.

For more information on setting up model level notifications for your account see docs

Success Warning Fails

Job notifications

Configure job completion notification emails. As an account administrator, you may configure notifications for yourself or for other users in your dbt account. You may also configure notifications for external emails in order to integrate with 3rd party systems.

To learn more about configuring dbt notifications, check out the docs.
